Mohamed Najib

PROFILE

State-Certified Engineer in Computer Science & Networks, specializing in MIAGE, currently pursuing the Expert in Information Technology and Information Systems – Artificial Intelligence track at EPSI Lille. Experienced in full-stack development and software engineering, with strong interests in AI, Data, Cloud, and Information Systems. Analytical, rigorous, and adaptable, with the ability to translate technical and business requirements into reliable solutions.

Eager to contribute to innovative projects while continuously strengthening my technical, analytical, and problem-solving expertise.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Internship | March 2026 – July 2026

Capgemini Engineering

- Designed and developed a web-based inventory and industrial product management solution tailored to the company's operational requirements.
- Developed and integrated frontend and backend features for managing products, inventory, suppliers, and related business operations.
- Designed the relational database, carried out functional testing, resolved technical issues, and contributed to the continuous improvement of the application.

Technologies : Angular, Spring Boot, PostgreSQL, Azure Blob, Azure OpenAI, Unity, REST API, Postman, JWT, Docker

Full Stack Developer

Final Year Internship (PFE) | March 2025 – July 2025

Capgemini Engineering

- Designed and developed an intelligent web platform for managing industrial 3D models
- Integrated an intelligent chatbot and immersive visualization using Unity
- Digitalized management processes, traceability, and automated PowerPoint file import

Technologies : Angular, Spring Boot, PostgreSQL, Azure Blob, Azure OpenAI, Unity, REST API, Postman, JWT, Docker

Full Stack Developer

Internship (PFA) | July 2024 – September 2024

6SOLUTIONS

- Designed and developed an online school management platform
- Implemented secure authentication, user management, course tracking, and scheduling
- Built a complete REST architecture with frontend/backend separation

Technologies : Spring Boot, Angular, MySQL, REST API, JWT

Développeur Web

Internship (PFA) | August 2023

BRIGHT VIEW MEDIA

- Developed an e-commerce website with product management, cart, orders, and admin space
- Implemented routing, database, and user authentication

Technologies : PHP, Laravel, MySQL, HTML, CSS, Bootstrap

Administration Réseau et Infrastructure IT

Internship (PFA) | August 2022

TSPP Group samir

- Designed enterprise network infrastructure
- Planned, configured, and secured local networks
- Documented architecture diagrams and deployment procedures

Technologies : LAN, TCP/IP, VLAN, IP addressing, network topologies

EDUCATION

EPSI – School of Computer Engineering

2026 – Present
Lille, France

Expert in Information Technology and Information Systems – Artificial Intelligence

Moroccan School of Engineering Sciences

2019 – 2025
Casablanca, Morocco

State Engineering Degree in Computer Science and Networks – MIAGE Specialization

Groupe Scolaire Jules Ferry

2018 – 2019
Mohammedia, Morocco

French-Option Baccalaureate in Physics and Chemistry

LANGUAGES

- French: Fluent
- English: Intermediate
- Arabic: Native

SKILLS

- Programming Languages :** C, C++, C#, Java, PHP, Python
- Web Development :** HTML, CSS, JavaScript
- Frameworks :** Django, Symfony, Spring Boot, Laravel, Angular
- Analysis & Design :** Merise, UML
- Databases :** MySQL, PostgreSQL, Oracle, MongoDB, SQLite
- Tools & Environments :** Docker, Git, GitHub, VS Code, Postman, Linux, VirtualBox
- Soft Skills :** Rigor, adaptability, analytical thinking, ethics, stress management, teamwork
